---

I have not done a lead consultation with HQ before... and I'm surprised they are asking for this for a removal. Getting in the weeds on lead bioavailability etc. seems like a remedial undertaking.  
Nic – How many grids would be lead only? Would this even really matter due to all the other stuff to be cleaned up?  
Phil

Left you a vmail on this issue. Consultation with HQ? Have you done before? They are asking if we have looked at lead bioavailability for cleanup in our decision document/action memo? Let's discuss tomorrow? Tx u
